Project Name	Reconstruction of the Municipal Water Supply System of Žabljak and Water Supply through Accumulation Lake
Start–End	November 2017–May 2021
Project Value	3.200.000 EUR
Slovenian Funding	900.000 EUR
Recipient Country/ Donation Recipient	Montenegro / Ministry of Sustainable Development and Tourism
Project Contractor	Vaira, inovativni inženiring d.o.o., Maribor
CRS CODE	CRS CODE 14021
Project Description	The existing water supply system, which supplies water to the inhabitants of Zabljak and eight nearby settlements, was built in 1949. The water is pumped directly from the water source, where the water quality is extremely good. The problem was the variability of supply from springs in the summer months and large water losses in the network (80%). Outdated plumbing was the reason for the loss of water and it also contributes to the degradation of water quality. As part of the project, a worn-out plumbing network was reconstructed and a multipurpose water reservoir with a connecting pipe was built. The donation of the Republic of Slovenia ensured sustainable supply of the inhabitants of the municipality of Žabljak with controlled quality drinking water.
Project Phase	The project is concluded.
