

Project Name	Construction of a Landfill for Construction Waste and additional Tubs for Communal Waste
Start–End	January 2023–September 2025
Project Value	986.058 EUR
Slovenian Funding	493.029 EUR
Recipient Country/ Donation Recipient	Montenegro / Municipality of Žabljak
Project Contractor	Eurozox d.o.o. Danilovgrad, Projectman d.o.o. Podgorica
CRS CODE	CRS CODE 14050
Project Description	<p>In Žabljak, the existing capacity for municipal waste management is insufficient, as the amount of waste has increased significantly in recent years due to the growth of the town and the development of tourism, and construction waste is an additional problem, as it is disposed of in large quantities in municipal landfills and wild landfills in the countryside. The project aims to build a new construction waste landfill and an additional disposal field on the existing municipal landfill in Žabljak, which will solve the problem of the current insufficient capacity for solid waste management and will allow the recovery and reuse of construction waste. The project will have a positive impact on the quality of life of citizens and will create conditions for more efficient solid waste management and better environmental protection on a sustainable basis, which will have a positive impact on tourism, economic growth and contribute to the competitiveness of the municipality's economy.</p>
Project Phase	The project is being implemented.
