

<b>Project Name</b>	Modernization of the Mineral Resources Exploitation – Automation of the Technological Process and Introduction of the Remote Supervision System in the Coal Mine Haljinići
<b>Start–End</b>	July 2010–December 2011
<b>Project Value</b>	404.000 EUR
<b>Slovenian Funding</b>	121.200 EUR
<b>Recipient Country/ Donation Recipient</b>	Bosnia and Herzegovina / Brown coal mine Kakanj d.o.o.
<b>CRS CODE</b>	CRS CODE 32220
<b>Project Contractor</b>	TEVEL, TEVE Varnost Elektronika, d.o.o., Kisovec
<b>Project Description</b>	<p>Within the project a control information and management system was introduced, which enables a continuous and automatic tracking of all technical-technological parameters, video surveillance of all relevant technological cycles and reduces the exposure of workers to the extreme microclimatic conditions. The construction of such system increases the safety at work. Because of the increased safety, fewer accidents are expected at the workplace. The organization of work, technical services and business structures has improved. By introducing the new system a safe and continuous production is enabled, operating conditions are improved, which enables further development of the mine, city of Kakanj and the region.</p>
<b>Project Phase</b>	Project is concluded.
