

Naslov projekta <i>Project Name</i>	Razvoj informacijskega sistema Agencije za zavarovalni nadzor Republike Srbske <i>Information System for the Insurance Supervision Agency of the Republic of Srpska</i>
Obdobje izvajanja projekta/ <i>Start - End</i>	19.1.2009 – 31.12.2010
Vrednost projekta po komercialni pogodbi/ (so)financiranje RS <i>Project Value/</i> <i>RS Co-financing</i>	317.192 EUR / 120.000 EUR
Država prejemnica pomoči/ prejemnik donacije <i>Recipient Country/</i> <i>Donation Recipient</i>	Bosna in Hercegovina / Agencija za zavarovalni nadzor Republike Srbske Bosnia and Herzegovina / Insurance Supervision Agency of the Republic of Srpska
Izvajalec projekta/ <i>Project Operator</i>	Hermes Softlab d.d., Ljubljana, Slovenija
Vsebinsko področje po OECD klasifikaciji <i>CRS CODE</i>	CRS CODE 24020
Opis projekta <i>Project Description</i>	<p>Strateški cilji z donacijo Republike Slovenije podprtega projekta so bili z vpeljavo učinkovitega nadzora nad poslovanjem zavarovalnic zagotoviti spoštovanje zakonodaje, onemogočiti neloyalno konkurenco med zavarovalnicami in izboljšati ekonomsko varnost zavarovancev, kar vodi v znižanje cen zavarovalnih storitev, večji obseg poslovanja in investicij zavarovalnic. Vse to posledično pomeni večjo trdnost finančnega trga v državi in večjo likvidnost celotnega gospodarstva. Zaradi kompleksnosti problematike je bilo za doseg ciljev potrebno izdelati sklop različne programske opreme, ki je vpeljala nadzor nad zavarovalniškim trgom na več nivojih.</p> <p><i>The strategic objectives of the project supported by the donation of the Republic of Slovenia were: to ensure compliance with the law by introducing an effective supervision over the operations of insurance companies, to prevent unfair competition among insurance companies and improve the economic security of the policyholders. Successfully implemented measures lead to the reduction of insurance services prices, to bigger scale of business and to increased investments of the insurance companies. This consequently ensures a greater stability of the financial market in the country and the increasing liquidity of the entire economy. Due to the complexity of the issues a set of various types of software had to be developed to achieve the objectives. The supervision of the insurance market on different levels has been successfully introduced.</i></p>
Stanje projekta <i>Project Phase</i>	Projekt je uspešno zaključen. <i>Project is successfully concluded.</i>
